--

Microsoft has not been punished for it's crimes.

It has a lot of cash on hand.

Let's set a fine double that amount, half due now, the other half in installments.

The money should be used to pay down the national debt.

Microsoft is leveraging it's monopoly into other areas such as MSNBC, MSN, Gaming etc.

Let's prevent it from doing so by limiting it's right to expand into any other areas but Windows.

Make Microsoft release it's hold on Bungee.

Bill Gates is personally abusing his Microsoft fortune via Corbis and other ventures.

Let's disallow Bill from using his money to personally extend Microsoft's monopoly into any industry.

He is also abusing the Gates Foundation's funds by displacing Microsoft competitive computers in schools and colleges - basically contributing Windows computers and software to displace Apple and Linux.

Let's stop the Gates Foundation from using Microsoft products to make donations.

Thank you
